Software developer, experienced in using a wide range modern web and mobile based technologies. Excited by continually learning new tools and approaches and working in a fast-paced and dynamic environment.

Informed by extensive customer facing experience, I am passionate about user experience and thrive when critically devising solutions from the perspective of an end user. Having studied political science, I pursued software due to its relevance to wider societal issues. I firmly believe in open-source communities using digital skills to help improve people's lives.

SKILLS

Javascript	Typescript	React	HTML	CSS/SASS	Node
Express	MongoDB	TDD	Firebase	Git	Linux

EXPERIENCE

Associate Software Engineer C# .NET SQL Azure, React
Resdiary | Dec 2022 - present

Resdiary is a reservation and table management platform used by a vast range of hospitality venues.

- Proactively taken on sprint tickets, contributing to the maintenance and further development of Resdiary's main diary application.
- Upgraded the frontend tooling of the application to ensure greater code consistency.

React Developer Typescript (React and React Native with Redux), Firebase
ScribePro | May 2022 - Nov 2022

ScribePro is a startup that creates digital solutions for medical records in sport and first aid, used by healthcare professionals looking to increase care in a pre-hospital setting.

- Developed a web portal for **ScribePro Teams**, used to manage the clinical well-being of athletes.
- Established a process for writing unit tests using **Jest** to check the validity of data across applications, facilitating a transition to using **TDD** throughout the code base.

ADDITIONAL EXPERIENCE

The Down Ballot | Mar 2022 - May 2022

- Created a content management system consisting of a **REST API** and a user facing dashboard, for easier data entry, built in **Typescript**.

Go Invest Green | Jan 2022 - May 2022

- Created new features for an environmental consultancy charity. Developed using **React, Redux, Theme UI and Heroku**.

EDUCATION

Code Clan, Professional Software Development Award 2021-2022

SQA Accredited qualification in full-stack software development. Began building applications with **Flask and Python**, before moving onto **React with MongoDB, Express and Node**. Finally finished the course by learning **Java and Spring**.
